### **ProSoft Technology Connects Industrial Automation's Biggest Protocols**

**Bakersfield, Calif., May 31, 2017** –EtherNet/IP™, Modbus®, and PROFINET have become increasingly prevalent across the automation industry – and so has the need to connect them.

With its newest gateway solutions, ProSoft Technology is allowing companies to use their EtherNet/IP or Modbus TCP/IP-based PLCs/PACs to control their PROFINET devices.

The EtherNet/IP-PROFINET and Modbus TCP/IP-PROFINET gateways allow users to remotely view and diagnose their networks, saving time. Both gateways feature two Ethernet ports, allowing users to isolate their networks and ensure that they only pass the data they want between their devices.

In addition, the EtherNet/IP gateway enables high-speed control of large systems via multiple I/O connections.

For more information about the gateways, please go to <http://psft.com/B54>.

**ProSoft Technology: Where Automation Connects**

ProSoft Technology specializes in the development of industrial communication solutions for automation and control applications. Our primary focus is to provide a connectivity interface that links dissimilar automation networks as seamlessly as if they were all from the same supplier. Essentially, ProSoft Technology products act as an interpreter so data can flow easily between machines that speak different languages. ProSoft Technology products include plug-in interfaces for large automation suppliers' controllers such as Rockwell Automation® and Schneider Electric®, as well as stand-alone gateways and industrial wireless solutions. ProSoft products can be found in nearly every industry that employs automation. Starting with one computer chip in 1988, ProSoft Technology now has over 400 products supporting more than 60 different industrial computer languages. Our goal is to support our customers from pre-sales through the entire life-cycle of the application. With 500 distributors in 52 countries and Regional Offices in Asia Pacific, Europe, the Middle East, Latin America and North America, ProSoft Technology is able to provide quality products with free technical support to customers worldwide.
